# Search Strategy

- Your Research Question
  - a clear answerable question
- Use PICO method
- Identify Keywords/phrases/MESH/thesaurus terms
- Select Sources of Information
- Use your search terms to retrieve academic papers
- Review & Appraise Results
- Renew your search

[www.westsussexknowledge.nhs.uk](http://www.westsussexknowledge.nhs.uk)

# PICO Formula

## PICO

The acronym used to help formulate a well-defined searchable question.

**P**

- Patient, population or problem: What are the most important characteristics of the patient and their health status?

**I**

- Intervention/Exposure: What main intervention are you considering (medical, surgical, preventative)?

**C**

- Comparison: What are the alternative benchmark or gold standards being considered, if any?

**O**

- Outcome: What is the estimated likelihood of a clinical outcome attributable to a specific disease, condition or injury?

[www.westsussexknowledge.nhs.uk](http://www.westsussexknowledge.nhs.uk)

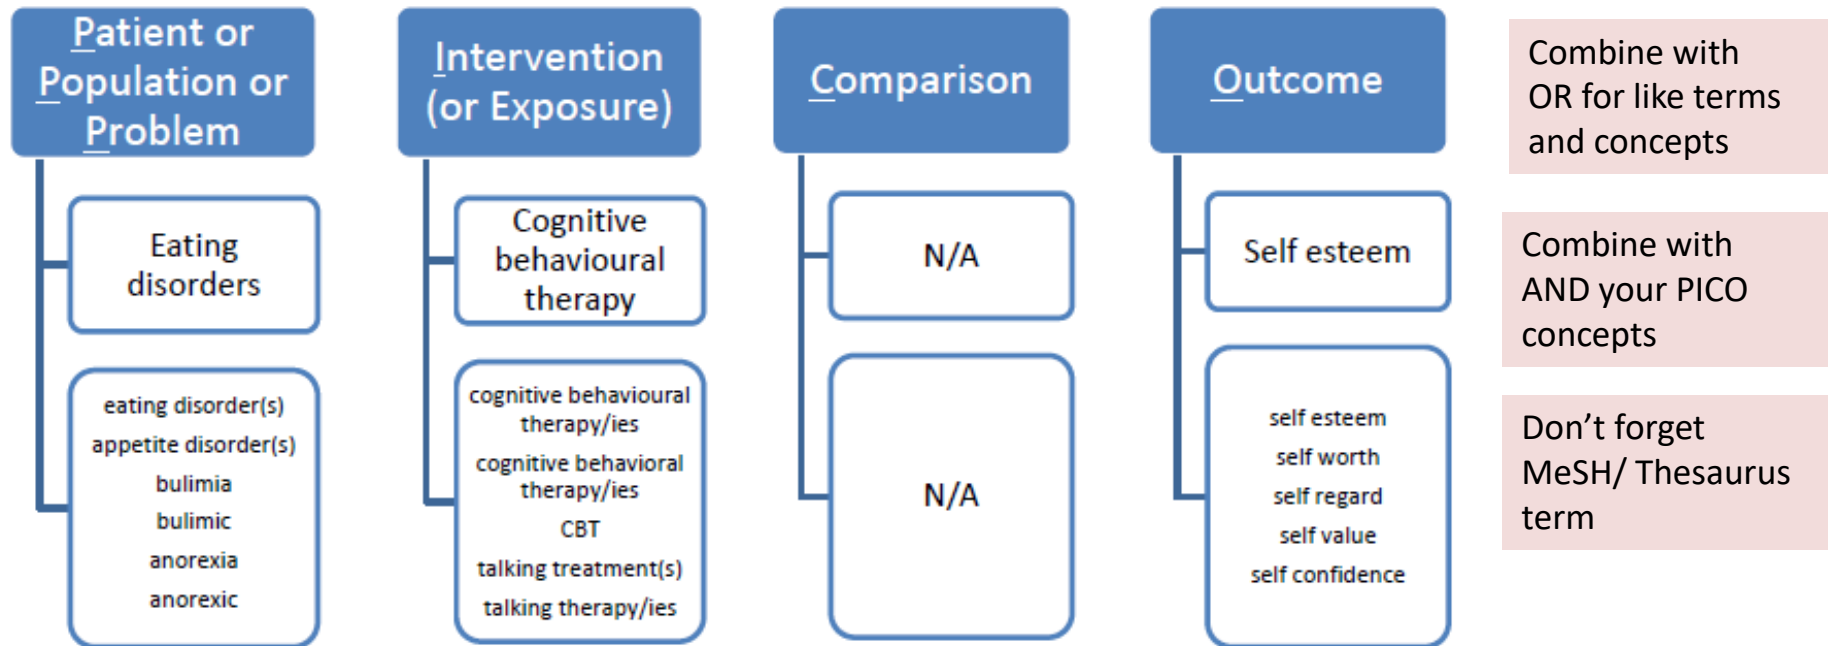

# Search Strategy

## Planning the search (PICO)

Write your research question here: Can cognitive behavioural therapy improve self esteem in patients with eating disorders?

You may be able to think of more synonyms, but just make sure you stick closely to the concept in question. If you are too broad, you may warp your results.

# Thesaurus

## Search

personality disorders

## Thesaurus
